EDUCATION

Bachelor of Applied Science in Software Engineering

University of Ottawa

September 2020 - June 2025

SKILLS

Programming Languages: Java, JavaScript, Python

Frameworks and Tools: Spring Boot, React.js, Next.js, PostgreSQL, MongoDB, Docker, Postman

Software Development: CI/CD pipelines, REST APIs, GraphQL, UI/UX design, QA, AGILE methodology

Soft Skills: Team collaboration, problem-solving, adaptability, time management, critical thinking, proactive learning, bilingual

EXPERIENCE

Software Engineer

Trolet

January 2026 - Present

- Refactored the **Java Spring Boot backend** and **DynamoDB**, ensuring reliable product publishing between our applications.
- Developed frontend components and features using **TypeScript** and **React.js (Next.js)** to improve employee workflows.
- Automated information entry from simple photos using the **Gemini API**, reducing manual data input.
- Built an **audit logging system** to provide detailed traceability for operations and facilitate efficient error identification.

Configuration Manager

Shared Services Canada

May 2024 - August 2024

- Maintained accurate **application-to-server relationships** in the CMDB, supporting incident impact analysis and service reliability.
- Gathered technical requirements and tracked deliverables across multiple teams, contributing to a **95% on-time delivery rate**.
- Gained hands-on exposure to **enterprise-scale infrastructure and cloud-adjacent operations** within various environments.

Software Engineer

Employment and Social Development Canada

September 2022 - December 2022

- Built a web application using **Java Spring Boot** and **JavaScript**, resulting in an improvement in user engagement and elevated **UX**.
- Managed and organized project documentation within **SharePoint**, implementing permissions to improve efficiency and security.
- Contributed to infrastructure (**Docker**, **Google Cloud**, and **CI/CD pipelines**) through critical bug fixes and continuous improvements.
- Developed **dynamic, data-driven** web pages for real-time analytics visualization, empowering users with instant insights.

PROJECTS

Customer Relation Management Platform | Java, TypeScript, Azure Active Directory, PostgreSQL, Twilio, Docker

- Enabled businesses to connect with their customers via Twilio's SMS gateway and perform bulk messaging and scheduled notifications.
- Designed a microservices architecture, separating services to ensure modularity and following the domain-driven design methodology.
- Achieved 90% test coverage in both frontend and backend using tools like JUnit, Mockito, Jest, Selenium and React Testing Library.

Online Marketplace | ASP.NET Core, C#, JavaScript, Azure Active Directory, Docker, PostgreSQL

- Developed an online marketplace website that allows users to browse, buy and resell shoes to users.
- Designed a React.js interface with advanced search and filtering options, enabling users to find shoes by brand, size and price.
- Implemented authentication using Azure Active Directory, integrating role-based authorization to control access to application features.
